AgileBits Review Executive Summary

AgileBits engaged CloudNative, Inc. to analyze their cloud-hosted services during September and October, 2015.

CloudNative performed a comprehensive review of the infrastructure upon which **1Password for Teams** is built on prior to public beta. The review focused on security, performance, cost and reliability of their AWS architecture along with a set of recommendation inline with current best practices.

CloudNative made and AgileBits implemented several recommendations regarding encryption of data at rest and in transit, data backup and recovery techniques and method of implementing intrusion detection and prevention.

AgileBits chose CloudNative because of their depth of knowledge and extensive experience in building robust services. CloudNative has won numerous prizes with multiple team members being recognized by Amazon as AWS Community Heroes.
